25X1

1. Construction of a three-story building 60 by 60 by 30 m. in size was commenced on the Zamecke Meadows near Litovel (P50/N76) in 1949 after a new road from Litovel to the Zamecka Morava River was built. The building was completed in the summer of 1951. The building was to be used as a new transmitter and jamming station.<sup>1</sup>
2. About 200 m. from the building two concrete squares were erected for transmitting posts and an underground reinforced concrete shelter was built about 100 m. from the building. The transmitting posts were to be 300 m. high, higher than the transmitter at Liblice.<sup>2</sup> These are supposed to be the strongest transmitters in Czechoslovakia, including jamming station transmitters. Detectors for illegal transmitters are to be located here also.
3. Two floors of the new building were to be used as the receiving center (sic) for the radar stations at Praded<sup>3</sup>, 70 kilometers away, Svaty Kopecek (P50/N96), 25 kilometers away, and Marianske Vrchy, 40 kilometers away.

1.  Comment: At first the buildings were surrounded by signs saying, "Building of the new post office - no admittance". But at the beginning of 1951 the army sent a guard of thirteen men from the military garrison at Olomouc to guard the area. This convinced the population that the new construction was not a post office. 25X1

2.  25X1

3.  Comment: Possibly the Praded Mountain, south of Jesenik (P51/H72), formerly Fryvaldov. 25X1
